

INTERNATIONAL CONFERENCE ON SMART AND SUSTAINABLE TECHNOLOGIES

IEEE

Split - Bol, June 25–28, 2024
Location: Bol, Hotel Elaphusa

Special Session:

Smart Distributed Electrical Network: Opportunities and Challenges for Integration of Renewable Energy Systems

ORGANIZERS

Mohan Lal Kolhe,
University of Agder,
Norway

Nils Jakob Johannesen,
University of South-
Eastern Norway,
Norway

CALL FOR PAPERS

A future 'Smart Distributed Electrical Energy Network' will serve as a dynamic network for multi-directional energy flows, linking widely distributed small capacity intermittent renewable energy systems at consumer level (distribution network) and centralized higher-capacity power generators, facilitating active participation of customer choice for demand side management, energy production / storage, and providing real-time information on the performance and optimal operation of the smart electrical energy network.

In this special session, high quality research articles are invited on the following topics:

- Intelligent integration of renewable energy sources within the distributed network.
- Machine learning techniques for load and generation predictions, and for operation and control.
- Distributed network interaction performance of renewable energy systems (e.g. solar photovoltaic system, fuel cells, distributed generators), power conditioning devices for intelligent integration of renewable energy systems.
- Demand side management, control and operation of distributed generators.
- Energy storage (e.g. battery, hydrogen, etc.) within the distributed network.
- Smart micro-grid architecture (AC as well as DC micro-grid).
- Impact of electric vehicles charging management on distributed network.
- Techno-economics of distributed generators.
- Energy pricing systems for promotion of smart distributed network.

FULL PAPER SUBMISSION:
February 29, 2024

[SUBMIT PAPER HERE](#)

Notification of acceptance:

April 25, 2024

Camera ready paper:

May 10, 2024
